

We want to make an investment in you and your growing construction company.

We offer all Buffalo Construction Exchange members the “**Building for Growth**” program.

This is a program that is designed to help contractors get started with our full integrated Construction Management System at an extremely discounted rate. We will work with you to come up with an investment plan that makes sense for your company.

We want to make sure you are in business for many years to come and will do all we can to help you make that happen! The logic is very simple - we make the investment in your company and work with you as a dedicated partner for many years to come. As your company grows, we grow with you, expanding the ways we can help you automate your business.

We know that change is not always easy.

We know that change is hard. Changing the way you’ve done things for years can be unsettling. Taking the time now to get your software upgraded as well as integrated will pay off for your company many times over. Let our experience help you get over the hurdle of making the change.

We have been able to remain a leading provider of software solutions to contractors all across Western New York, as well as the Northeast for over two decades.

We would like the opportunity to show you our software at your convenience. Let us know when you are available to discuss your specific needs and we will meet with you and show you personally how we can help you. Our goal is to talk with you and learn about your company and your goals. We want to learn as much about you and your company and only then can we put together the right solution for your company.
