Job Costing for the Construction Industry, Including Proper Labor Rates
• Understand how accurate job costing fits into the whole construction process
• Understand the importance of knowing all your costs
• Learn what components make up job costs
• Learn what three major types of expenses make up indirect costs
• Learn the different methods of allocating indirect costs
• Understand the importance of monitoring job costs

A Brief Overview of Topic 606
• Understand Revenue Recognition For Contractors

Presenters
Daniel B. Weintraub, CPA is a partner at Lougen Valenti Bookbinder & Weintraub, LLP, and serves as director of the firm’s accounting and auditing practice. Dan is responsible for the management of the firm’s quality control and attest services to clients, as well as compliance with applicable professional standards. Dan brings over three decades of experience working with and providing advice to clients including various construction contractors and real estate developers. Dan’s area of concentration includes audits, reviews and compilations of financial statements.

J. Kincaid, CPA is a Partner at LVBW and concentrates his services in auditing and accounting for a variety of clients in the construction and refining industries. J is responsible for audits, reviews, and compilations on financial statements. J leads the audit team in the use of sampling methodologies and using the firm’s data extraction and analysis tools. These resources allow the firm to download client accounting data for various analyses often resulting in substantial time savings for clients’ accounting personnel as they prepare for an audit.
